DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-75 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of the independent claims, the phrase "determining a pattern" is vague and indefinite since it is not clear what pattern is being determined. What is forming the pattern and what type of pattern is being formed? Claims 2, 19, and 51, are indefinite since they claim "assuming a value" yet are dependent from claims in which that value is "ascertained". Ascertained or ascertaining implies determining a fact, not making an assumption. Therefore, the claims are contradictory. Claims 6, 23, 59, 67, and 69 are all alternative and indefinite.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-75 are rejected under 35 U.S.C. 102(b) as being anticipated by either one of Saban or Reedy.

See especially column 12, lines 10-45 of Saban and column 4, line 40 – column 8, line 60.

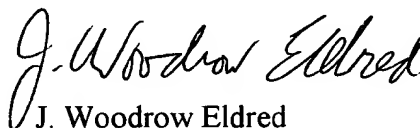

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsang, Bessacini, and Caputi, Jr. is cited as being of interest since they disclose target tracking systems.
